Education

B.S. Software Engineering

Fall 2006 to Spring 2011

Minors in Computer Science and Economics (Behavioral Economics focus)

Rochester Institute of Technology, Rochester, NY

Languages/Skills

Native Mobile

Flutter, Swift, Objective-C, Dart, iOS SDK, tvOS SDK, UIKit, Cocoa Touch, AVFoundation, Core Data, Core Graphics, Core Location, Core Animation, SwiftUI, Combine, Auto Layout, Interface Builder, CocoaPods, Carthage, ObjectMapper, Xcode, RxSwift

Web UI

TypeScript, JavaScript, Node.js, Express, Restify, PHP, CSS, SASS, LESS, Zend Framework, jQuery, Underscore.js, Backbone.js, Angular, Require.js, Mustache.js, Grunt, Visual Studio Code

Web Services

Java, SQL, DynamoDB, AWS, Spring, CXF, REST, Maven, RxJava, API Design, Eclipse, Visual Studio

General

Perforce, Subversion, Git, Jira, Agile, Scrum

Work Experience

Walt Disney Parks & Resorts Technology, Glendale, CA / Orlando, FL

Lead Software Engineer

June 2022 to present

Sr. Software Engineer

May 2018 to June 2022

- Served as full-stack developer for a variety of Lightning Lane and Benefits features for Guest Service Suite (GSS) – the main Cast tool used worldwide to assist Guests. (TypeScript, JavaScript, Java, Spring, Visual Studio Code, IntelliJ, Git)
- Migrated native Virtual Queue from Swift/Kotlin to Flutter. (Flutter, Dart, Swift, Kotlin, Java, iOS, Android, Visual Studio Code, Git)
- Contributed to Guest-facing virtual queue functionality at Disneyland Resort and Walt Disney World. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, Carthage, Git, Xcode)

- Led development for tool to configure and monitor virtual queues in real-time at Disneyland Resort and Walt Disney World. (TypeScript, Angular, Node, Express, Restify, SCSS, Docker, Git)
- Developed backend virtual queue functionality at Disneyland Resort and Walt Disney World. (Java, Spring, CXF, Hystrix, Docker, Git, DynamoDB, AWS)
- Contributed significant updates to FastPass at Walt Disney World and Disneyland Resort. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, Carthage, Git, Xcode)
- Made ongoing improvements to the PhotoPass portion of the Disney Parks iOS application. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, Carthage, Git, Xcode)

Disney | ABC Television Group, Burbank, CA

Oct 2017 to May 2018

Sr. Software Engineer

Served as technical lead of 9 for the iOS and tvOS ABC applications. Developed tvOS Search, and Home Screen for a significant ABC redesign. Responsible for CI/CD, unit and UI testing standards, and architectural guidance. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, CocoaPods, RxSwift, Git, TestFlight, Xcode, fastlane)

Walt Disney Parks & Resorts Technology, Orlando, FL

Sr. Software Engineer

Software Engineer

Web Developer

May 2015 to Oct 2017

Dec 2012 to May 2015

May 2011 to Dec 2012

- Developed Guest-facing native iOS UI for selecting Fastpass experiences at Shanghai Disney Resort. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, CocoaPods, Git, HockeyApp, Xcode)
- Developed Guest-facing native iOS UI for selecting FASTPASS experiences at Disneyland Resort. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, CocoaPods, Carthage, Git, HockeyApp, Xcode)
- Regularly improved the Guest-facing native iOS UI for FastPass+ selection at Walt Disney World Resort. (Swift, Objective-C, Core Animation, Interface Builder, Auto Layout, CocoaPods, Git, HockeyApp, Xcode)
- Developed web UI for one-at-a-time model of selecting FastPass+ experiences. Served as team lead and regularly presented to stakeholders. (AngularJS, LESS, Node.js, Express, Restify)
- Developed native iOS FastPass+ Cast Tool, allowing Cast Members to quickly view and book FastPasses on behalf of the Guest. (Swift, Interface Builder, Auto Layout, Xcode, Git)
- Developed native iOS virtual reader application, allowing mobile devices to augment physical readers at FastPass+ locations. (Swift, Core Animation, Interface Builder, Auto Layout, Xcode, Git)
- Developed Cast as Guest FastPass+ hybrid application, augmenting a mobile web experience with native functionality. (Objective-C, PhoneGap, Xcode, Git)
- Served as Team Lead, REST API designer and full-stack Software Engineer for Great Food Fast, Disney's food Pre-order Service. Played a critical role in delivering on-time and on-budget. Regularly presented to stakeholders each sprint. (PHP, Zend, JavaScript, Java, HTML5, AngularJS, SASS, CXF, REST, Spring, Eclipse, Sublime Text, Perforce, Git)
- Served as Team Lead and Web Developer over creative updates to dining menus. Played a critical role in delivering on-time and on-budget. Regularly presented to stakeholders each sprint. (PHP, Zend, SASS, CSS, HTML, Perforce)

- Redesigned FastPass+ Select New web flow to streamline the Guest FastPass+ selection process. Served as web developer, web service developer and REST API designer. Served as lead developer on a web service resource. (JavaScript, Java, Spring, CXF, HTML5, AngularJS, CSS, SASS, REST, Eclipse, Sublime Text, SVN, Git)
- Worked on a full-stack triage team supporting production issues on My Disney Experience (Disneyworld.com and Disneyland.com). (PHP, JavaScript, HTML5, CSS, Java, Zend, jQuery, Mustache.js, Eclipse, Perforce)
- Developed Guest and Cast apps utilizing MyMagic+ infrastructure to personalize the in-park experience. Served as web developer, web service developer and REST API designer. Served as lead web developer on one Cast-facing app and lead web service developer for several resources supporting the Guest-facing web app. (PHP, JavaScript, HTML5, CSS, Java, Zend, jQuery, Underscore.js, Backbone.js, Require.js, Mustache.js, Guava, Eclipse, Git, Perforce)
- Developed and Maintained several features of My Disney Experience (MDX) – Finder Listing, Finder Search (Lead Developer), Claim Resort Reservation (Lead Developer), Itinerary Day View Modals, Park Hours, MDX Landing Page, My Disney Vacation to MDX Migration. (HTML5, CSS, JavaScript, PHP, Java, Zend Framework, jQuery, Mustache.js, JBehave, Eclipse, Photoshop, Perforce)

Trifecta Technologies, Allentown, PA
Software Engineer

Nov 2010 to May 2011

Developed and maintained several Guest, Cast and In-Attraction MyMagic+ native mobile and web application prototypes for The Walt Disney Company. (iPhone/iPad SDKs, Objective-C, PHP, OCUnit, Xcode, Photoshop)

Walt Disney World Parks & Resorts, Orlando, FL
Information Technology Professional Intern

May 2010 to Nov 2010

Developed and maintained several Guest, Cast and In-Attraction MyMagic+ native mobile and web application prototypes. (iPhone/iPad SDKs, Objective-C, PHP, ASP.NET, C#, Python, OCUnit, VS2010, Xcode, Eclipse, Photoshop)
