

<Brandon Pastuszek />

Lead Software Engineer | Full-Stack, Platform & Product Engineering

📞 570-898-4588 ✉️ brandonpastuszek@gmail.com 🌐 brandonpastuszek.github.io

Lead software engineer and product-focused technical leader with 15+ years designing, building, and operating high-traffic consumer and enterprise platforms. Hands-on across TypeScript and Angular, Java and Kotlin services, native and cross-platform mobile, APIs, cloud delivery, CI/CD, and observability. Led teams of up to 15 and partnered with product, design, operations, international engineering teams, and executives to take complex initiatives from discovery through production.

15+ years

Software delivery

Teams up to 15

Technical leadership

Full-stack scope

Discovery → Production

End-to-end ownership

// CORE EXPERTISE

Languages	TypeScript, JavaScript, Java, Kotlin, Python, Swift, Objective-C, SQL	Web & Services	Angular, AngularJS, Node.js, Express, Restify, Spring Boot, REST API design, Web Serial API
Mobile	iOS, Android, Flutter, tvOS, native-to-cross-platform modernization	Cloud & Data	AWS, Azure, GCP, Docker, Kafka, Kinesis, SQL databases, MongoDB, DynamoDB, Redis
Delivery & Operations	System design, software architecture, SDLC, CI/CD, GitHub, GitLab, Jenkins, Harness, Splunk, Agile	AI-Assisted Engineering	Claude, ChatGPT, Codex, Cursor, GitHub Copilot, prompt engineering, rapid prototyping and evaluation
Leadership	Technical strategy, workstream leadership, mentoring, cross-functional delivery, executive communication	Product Engineering	Discovery, requirements, architecture, implementation, release, production operations and feedback

// EXPERIENCE

- Independent Product & Software Engineering**

Orlando, FL

Self-employed consulting

Senior Product Engineer

May 2026–Present

 - Lead engagements from discovery and requirements through product design, full-stack implementation, release, production monitoring, and feedback.
 - Use Claude, Codex, and other AI engineering tools to accelerate prototyping, implementation, debugging, and testing while retaining hands-on technical ownership.
 - Present solution options, technical tradeoffs, and delivery progress to organizational leaders.
- Disney Experiences**

Orlando, FL

Consumer products, operations platforms, and guest technology

Lead Software Engineer

Jun 2022–May 2026

Senior Software Engineer

May 2018–Jun 2022

 - Led teams ranging from one to 15 engineers across mobile, web, backend, integration, and production operations while remaining hands-on in architecture and delivery.
 - Integrated Hong Kong Disneyland's point-of-sale system with a Cast-facing Lightning Lane booking flow through the Web Serial API, reducing transaction steps and enabling faster in-person sales.
 - Modernized and launched the domestic Guest Service Suite for Hong Kong Disneyland using Angular, TypeScript, and Kotlin; served as the data, testing, and systems-integration lead across international teams.
 - Developed Virtual Queue from its initial launch across Walt Disney World and Disneyland apps, returning thousands of aggregate years of wait time to guests annually and contributing to increased nearby food-and-beverage sales.
 - Migrated Virtual Queue from separate Swift and Kotlin implementations to Flutter, partnered directly with Google, and helped establish a shared mobile and web codebase.
 - Directed migration planning from Braze to Adobe Journey Optimizer through API evaluation, prototyping, architecture, and implementation guidance.
 - Created self-diagnosing Splunk alerts that surfaced production issues before guest reports and gave support teams actionable remediation steps; also introduced Claude, Cursor, and GitHub Copilot into engineering workflows.
- Disney | ABC Television Group**

Burbank, CA

ABC, FX, and National Geographic applications

Senior Software Engineer

Oct 2017–May 2018

 - Led an iOS and tvOS redesign of the ABC application, improving the interface and performance while creating a white-label foundation later used to onboard FX and National Geographic.
 - Replaced manual local releases with an automated GitLab-to-Jenkins-to-TestFlight pipeline.
 - Served as technical lead for nine engineers and regularly presented delivery updates to executives.
- Disney Parks & Resorts Digital**

Orlando, FL

Promoted from Web Developer to Software Engineer to Senior Software Engineer

Senior Software Engineer

May 2015–Oct 2017

Software Engineer

Dec 2012–May 2015

Web Developer

May 2011–Dec 2012

 - Led FastPass+ Simplification across mobile, web, and backend systems, making attraction selection easier while presenting product and technical decisions to executives.
 - Led Great Food Fast, Disney's first digital food pre-order service, spanning the mobile ordering experience and backend fulfillment.
 - Expanded FastPass selection to Shanghai Disney Resort, Disneyland Resort, and Walt Disney World, and developed itinerary and discovery experiences across web and backend systems.
 - Built Cast-facing iOS tools for booking FastPasses and augmenting physical readers at attraction entrances.
- Trifecta Technologies**

Allentown, PA · Remote

Software engineering and rapid prototyping

Software Engineer

Nov 2010–May 2011

 - Developed and maintained native mobile, web, and backend MyMagic+ prototypes for a \$1B+ Disney Parks technology initiative while completing a software engineering degree remotely.
- Walt Disney World Parks & Resorts**

Orlando, FL

MyMagic+ research and prototyping

Information Technology Professional Intern

May 2010–Nov 2010

 - Built guest-, Cast-, and attraction-facing mobile, web, and backend prototypes and presented concepts to executive teams as often as four times per week.
